

# Policy for installing solar power at home

Do you need planning permission to install solar panels?

Current rules that require businesses to apply for planning permission if solar panels will generate more than one megawatt of electricity will also be scrapped, meaning organisations will be able to install more solar panels on rooftops without the delay and cost of applying for planning permission.

What is needed to install solar panels on UK homes?

Here's a quick guide to what's needed to install solar panels on UK homes: An installer should visit to determine if the property is suitable for solar panels. They will look at the size and orientation of the roof to decide the best location and angle for installing panels.

Are there building regulations for solar panels?

There are building regulations for solar panels, as there are for most home improvements. These government regulations are frequently updated to ensure that any alterations made to properties don't threaten the safety or health of people who live or work in them.

Can solar panels be built without permission?

This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission. The exceptions to this rule are typically flats, listed buildings, homes in conservation areas, and ground-mounted installations. What are the building regulations for solar panels?

Can I install solar panels on my own?

If in doubt it is worth checking the GPDO rules on the Planning Portal and having a word with your local planning department if possible. "Can You Install Solar Panels on Your Own?" "Installing solar PV panels is not a DIY job," David Hilton warns.

How many solar panels should a house have?

The ideal property for solar panels would have a decent amount of space on its roof - typically we look for homes that can manage at least eight panels, but ideally it should be able to fit ten or more. It's best for a roof to be south-facing, but in some cases it's actually better with east-west roofs, as you can get more panels on.
