Where is BP Batam developing a solar power plant?

BP Batam is currently developing a Solar Power Plant (PLTS) at Duriangkang Reservoir on Batam Island. This project, upon completion, is set to become the world's largest floating solar plant, with a staggering capacity of up to 2,000 MW.

Why did PT PLN Batam install a solar power plant?

On November 6, 2024, the community of Tanjung Uma in Batam witnessed significant economic changes due to the deployment of a Solar Power Plant (PLTS) by PT PLN Batam, which has provided consistent and reliable power to the area, supporting both residential needs and local businesses.

Where is trembesi floating solar power plant located?

The Trembesi Floating Solar Power Plant with a capacity of 35 MWac or 46 MWp is located at the Trembesi Reservoir, Saguling District, Batam City, Riau Islands. The Trembesi Floating Solar Power Plant is a collaboration with PT TBS Energi Utama Tbk.

Why is BP Batam building the world's largest floating solar power plant?

BP Batam's initiative to construct the world's largest floating solar power plant at Duriangkang Reservoir marks a significant milestone in renewable energy development. With a projected capacity of 2,000 MW, this project surpasses the largest existing water-based solar facility tenfold and positions Batam as a leader in sustainable energy.

Can solar power improve economic stability in Tanjung Uma & Batam?

In Tanjung Uma, Batam, a solar power initiative has dramatically improved local economic stability and business prospects, enabling round-the-clock electricity supply.

Will PT TBS Energi Utama Tbk build solar panels at Tembesi reservoir?

Similarly, Dimas Adi Wibowo, SPV Business Development of PT TBS Energi Utama Tbk, confirmed their commitment to green energy, with plans to build solar panels of 46 MWp capacity at the Tembesi Reservoir.
