

Quotation solar system Romania

How much solar energy does Romania need?

In the context of the European ambitions, Romania would need to aim for 44.4% RES, meaning 11.1 GW of solar - 6.1 GW for utility-scale and 5 GW for rooftop PV1. Drivers for solar growth The last two years have been marked by significant legislative changes that underpinned the development of the Romanian PV sector.

What is the future of PV in Romania?

The Romanian PV market has entered a new boom phase, driven by the current security context, the imperative of green transition, and the favorable permitting framework. As the country moves towards decarbonization and the large-scale adoption of clean technologies, the outlook for the future of PV points to sustained development.

What drove the growth of the prosumers segment in Romania?

Another significant factor that drove the growth of the prosumers segment in Romania was the subsidy program and the fourfold increase in the funding to 610 million EUR, coupled with the possibility for prosumers with an installed capacity of up to 400 kW per consumption point to sell the excess electricity directly to their electricity supplier.

An Analysis of Romania's budding Solar Market In the forecast period of 2020-2025, the Romanian solar energy market is expected to grow at a CAGR of 10%. A major reason why solar power costs have come down over the last few years is because governments and private institutions have taken initiatives to promote research and development in this field at an ...
