

How many solar panels are there in Cuba?

This greatly underdeveloped energy source is slowly making its way across the island: there are currently more than 6,000 photovoltaic panels and 1,500 solar heaters in use. The installed solar energy generating capacity in Cuba is around 3 megawatts, or 0.07 % of the total installed capacity.

How will Cuba's relationship with other countries impact the energy transition?

Cuba's relationships with other countries will be key to realizing the energy transition. Since 2000, Venezuela has been Cuba's primary source of imported oil. However, political and economic troubles in Venezuela caused oil exports to Cuba to fall by about half, resulting in Cuba increasingly seeking oil imports from Mexico and Russia.

Is Cuba facing a severe economic crisis?

Compounding these problems, Cuba is facing a severe economic crisis, with rising inflation, decreased exports, and the introduction of austerity measures. Overcoming these energy challenges amidst the economic crisis will be extremely difficult.

The Cuban regime has recently inaugurated three solar parks in Cuba, donated by the China International Development Cooperation Agency. This past Tuesday, authorities reiterated their promise to add 1,000 MW to the Cuban energy grid through future investments in solar parks. However, these projections face the harsh reality of an obsolete and ...

Una de las mejores paladares de Cuba está en un solar, el de la calle Concordia 418, entre Gervasio y Escobar en Centro Habana. Es La Guarida, sitio donde se filmó la famosa película cubana 'Fresa y Chocolate'. Aunque no es barata, la exquisitez de sus platos y la historia del local bien valen la visita. Recomendando el ceviche y la paella ...
