

Kongsberg Seatex AS is trusting Saft batteries to power their AIS (Automatic Identification Systems) base stations in Norway. The rechargeable lithium-ion MP 176065 xtd cells offer the ...

Key benefits of Saft's Ni-Cd aircraft battery systems . Reduced maintenance: Our PBE technology reduces maintenance requirements by over 50 percent; Long service life: Smart design, high-quality materials and solid construction extend life by up to 10 years; Less weight: The use of lightweight PBEs reduces fuel consumption

Powerful lithium-ion batteries for immediate backup . Saft cutting-edge li-ion battery solutions deliver an immediate independent power source in the event of an outage to ensure the continuity of the UPS protecting high-value, mission-critical data. Our range of advanced and powerful lithium-ion batteries can instantly crank up an emergency generator engine, offer high ...

Features & Benefits. The Compact maintenance-free nickel batteries are designed to support essential control systems and other critical equipment in remote and hard-to-access locations in offshore oil and gas, utility, ...

Saft, the battery energy storage system (BESS) specialist fully-owned by energy major Total, emailed Energy-Storage.news today to reveal details of the project, which is being built to support Viinamäki, a 21MW wind ...

We provide turnkey solutions up to hundreds of MW's that integrate a Saft lithium-ion battery system with power-conversion devices as well as power control and energy-management functions. Saft's lithium-ion energy storage systems batteries are used for: Large renewable integration (PV and wind farm) installations

Saft's LS, LSH and LSP cylindrical primary lithium cells ranges, all based on Lithium-Thionyl chloride (Li-SOCl₂) ... BIS for Li-SOCl₂ cells and batteries, Version 2.2 Battery Information Sheet (BIS) Download (English) Adevice case ...

Reliable Saft Ni-Cd battery solutions for power plants backup. Saft nickel battery solutions provide backup power to power plants to ensure the continuous, uninterrupted operation of generator units, emergency lighting, critical safety and control systems for up to 100 hours. Our high-performance Ni-Cd battery technology is designed for easy installation and minimal ...

Compact. Les nouvelles batteries au nickel Compact de Saft permettent de rationaliser l'espace et de réduire les budgets de maintenance des sites industriels. La nouvelle gamme de batteries de secours au nickel est conçue pour supporter les systèmes critiques dans des installations industrielles éloignées et difficiles d'accès

The battery offers very high energy density at a reduced cost with no maintenance. The new Seanergy 2.0 battery is built using Saft's proven lithium-ion technology for a compact, maintenance-free solution in a modular design, allowing the battery system to be adapted to each user profile. The new design optimizes the system volume ...

Saft has established a network of over 35 bring-back points worldwide, where you can drop off used Ni-Cd batteries, including those made by Saft's competitors. To reduce CO2 emissions during transport, the bring-back points in Sweden, Finland, Norway, and the United Kingdom bring the batteries back to Oskarshamn, while the rest are sent to the ...

Customized battery solutions. Saft is designing and manufacturing any tailor-made Li-ion battery, from chemistry to systems, including electronics. For customers designing their own electric powertrains or completing vehicles for a specific application, Saft provides a complete and fully-integrated battery solution to reply to specific needs. ...

Soft solution for high power space applications based on Saft VL51ES Li-ion cell. Specifically designed for GEO and MEO applications. ... Battery specific energy superior to 130Wh/kg. Adaptable configuration from 2p to 12p and from 6s to 36s. Reliability and safety. PR architecture, up to 100V bus; Technical Specifications. Optional by-pass ...

You can also ask for restriction of the data, portability of the data and/or make a claim to the CNIL (the French data protection agency). For any request please send it to GDPR@saft or to the following address: Saft Groupe SAS Communications Department 26, quai Charles Pasqua 92300 Levallois-Perret - France [Find out more](#)

The battery is based on VES16 space cells designed for LEO applications. This battery is sized for low power needs, such as microsats and nanosats, and can be used as a building block and assembled in serial and parallel for higher energy requirements. ... Saft Groupe SAS Communications Department 26, quai Charles Pasqua 92300 Levallois-Perret ...
