What is Intelligent Power Solutions?

Intelligent Power Solutions (IPS) is a trusted resource for all of your power quality needs. For nearly 25 years, they have been delivering, supporting, and servicing comprehensive power quality solutions.

What are intelligent power supply solutions?

We offer a comprehensive set of intelligent power supply solutions to meet these challenges. Traditional power supply designs use analog ICs with fixed functionality to provide regulated power. The intelligent power supply integrates a microcontroller (MCU) or Digital Signal Controller (DSC) for a fully programmable and flexible solution.

How can I work with Intelligent Power Solutions?

Working with Intelligent Power Solutions is easy. You can schedule a free consultation with just a few clicks to determine the optimal solutions for your needs. Dependable power and a partner you can trust.

Does an intelligent power supply need to be complex or expensive?

An intelligent power supply does not need to be complex or expensive. We deliver everything you need to create your power conversion design: low-risk product development, lower total system cost, faster time to market, outstanding technical support, dependable delivery and quality.
