

How will Senegal's power sector be strengthened?

Senegal's power sector would be strengthened by continued diversified investment in power, including renewables and natural gas, while phasing out heavy fuel oil. Senegal Energy Outlook - Analysis and findings. An article by the International Energy Agency.

What is Senegal's energy policy?

The IEA's Energy Policy Review of Senegal 2023, published today, finds that energy is at the heart of Senegal's 2035 strategy for accelerating sustainable development and economic growth known as the Plan S&#233;n&#233;gal &#201;mergent(PSE), or the Emerging Senegal Plan.

Will Senegal's economy grow six-times bigger in the AC?

Senegal's economy could grow six-times larger in the AC while limiting growth in energy demand to three-times its current level by utilising new gas resources and boosting the use of renewables in power. In the AC, gas meets a growing share of energy demand while traditional use of biomass starts to decline in rural areas. IEA. Licence: CC BY 4.0

Can Senegal achieve its broader economic objectives?

Senegal's significant efforts to develop its energy sector and deliver energy access to more people are laying important groundwork for the country to achieve its broader economic objectives, according to a new report from the International Energy Agency (IEA).

How has Senegal reformed its energy sector?

Since the launch of the Plan S&#233;n&#233;gal &#201;mergent, Senegal has adopted reforms designed to attract foreign investment in its energy sector and boost participation from the private sector, while leveraging significant support from development finance institutions.

Will Senegal become an oil and gas producer in 2024?

This partnership could mobilise up to EUR 2.5 billion to support Senegal's efforts to achieve universal energy access and strengthen a resilient, secure and sustainable energy system that fosters sustainable development and economic growth. In 2024, Senegal is expected to become an oil and gas producer.

Senegal's Energy Policy Review comes at a time when the country is taking stock of progress made within the framework of its Lettre de politique de d&#233;veloppement du secteur &#233;nerg&#233;tique (LPDSE 2019-2023) which is a energy sector development policy letter. A new LPDSE is under preparation for 2024-2028, with a consultation launched in July 2023.
