What is Serbia's energy investment plan?

The Ministry of Mining and Energy has announced a EUR15 billion investment plan for the electricity sector in next several years, expecting to reach more than 3 GW of renewable energy production plants. The main players and investors in the Serbian Energy Sector are:

What type of energy is used in Serbia?

Energy in Serbia is dominated by fossil fuels, despite the public preference for renewable energy. Serbia's Total Energy Supply is almost 700 PJ, with the energy mix in 2021 comprising coal (45%), oil (24%), gas (15%), and renewables (16%).

Does Serbia subsidize coal & electricity prices?

Serbia heavily subsidizes coal and electricity prices, inhibiting competition. Recently, the Serbian government and EPS have announced ambitious plans to transition to green energy solutions and reduce Serbia's dependence on Russian natural gas.

What percentage of Serbia's electricity comes from coal?

Serbia's national power utility Electric Power of Serbia (EPS) produces nearly 70 percent of the country's electricity from coal and nearly 27 percent from hydropower, with approximately 4% coming from private developers in wind and solar energy. Serbia heavily subsidizes coal and electricity prices, inhibiting competition.

Will China invest 2 billion euros in Serbia?

BELGRADE, Jan 26 (Reuters) - China has agreed to invest 2 billion euros (\$2.18 billion) in Serbia to build wind and solar power plants and a hydrogen production facility, the biggest investment in renewable energy in the Balkan country to date, Serbia's mining and energy ministry said in a statement.

When did Serbia start producing electricity?

On 6 October 1893, the first Serbian power plant, located in the Dorćol urban neighborhood of Belgrade, began production of electricity. In 1900, the first alternating current hydroelectric power plant Podgradom in Užice on the river Zetinja went online.
