

Slovakia cumulus energy

Does Slovak Republic have a low-emissions electricity system?

The Slovak Republic's low-emissions electricity system is a cornerstone of its energy security and helps decarbonise hard-to-abate sectors, but more progress on renewables and energy efficiency is needed.

Is the Slovak Republic achieving its climate and energy goals?

The latest review of the Slovak Republic took place in October 2023. The review finds that the Slovak Republic has made significant progress in reaching its climate and energy goals owing to its low-emissions electricity system, with nuclear, hydropower and other renewables combined meeting around 85% of the country's electricity demand.

How is energy used in Slovak Republic?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Will Slovakia be a net exporter of energy in 2022?

Slovakia has a plan to get renewable sources of energy up to 19.2% by 2030. From 2024, following the completion of two new nuclear reactors, Slovakia will return to being a net exporter of electricity. Slovnaft is the largest oil refinery in Slovakia. In 2022 Slovakia sought to reduce its reliance on oil from Russia.

What are Slovak Republic's energy policies?

Slovak Republic's recent energy policies have made significant progress. Along with its neighbours and with support from the European Union, the country has strengthened cross-border connections for electricity, natural gas and oil, improving its ene

How did Slovakia reduce its reliance on natural gas in 2022?

In 2022 Slovakia sought to reduce its reliance on natural gas from Russia who was supplying 81% in 2020. In order to lower reliance, a gas pipeline interconnector with neighbouring Poland was completed by August 2022 and put into operation in a bilateral opening ceremony on the 26 August 2022.
