

How has the Slovak Republic improved its energy policy?

The latest review of the Slovak Republic's energy policies finds the country has made significant progress on several fronts. Along with its neighbours, and with support from the European Union, it has strengthened cross-border connections for electricity, natural gas and oil, improving its energy security and increasing market competition.

Is Slovakia a net exporter of electricity?

From 2024, following the completion of two new nuclear reactors, Slovakia will return to being a net exporter of electricity. Slovnaft is the largest oil refinery in Slovakia. In 2022 Slovakia sought to reduce its reliance on oil from Russia. Slovenský plynárenský priemysel (Slovak Gas Industry) is the main natural gas supplier in Slovakia.

How much energy does Slovakia use?

Primary energy use in Slovakia was 194 TWh and 36 TWh per million inhabitants in 2009. Slovakia has a plan to get renewable sources of energy up to 19.2% by 2030. From 2024, following the completion of two new nuclear reactors, Slovakia will return to being a net exporter of electricity. Slovnaft is the largest oil refinery in Slovakia.

How did Slovakia reduce its reliance on natural gas in 2022?

In 2022 Slovakia sought to reduce its reliance on natural gas from Russia who was supplying 81% in 2020. In order to lower reliance, a gas pipeline interconnector with neighbouring Poland was completed by August 2022 and put into operation in a bilateral opening ceremony on the 26 August 2022.

Does Slovakia have electricity interconnection capacity?

Slovakia has significant electricity interconnection capacity compared to its electricity generation capacity. The planned increase of new nuclear capacity is accompanied by new connections, e.g. with Hungary, aimed at reducing congestion. The interconnection level is projected to be at 52% in 2030. The

How many coal power stations are there in Slovakia?

Two coal power stations were operated in Slovakia until 2024, with the power station at Nováky closing in 2023, and the power station at Vojany ceasing production in spring 2024. Slovakia currently does not have thermal powerplants in operation and relies on nuclear power generation and power generation from renewables.

Slovakia's renewable energy targets and strategy. Slovakia's National Energy and Climate Plan sets an ambitious target of achieving a 19.2% share of renewable energies in gross final energy consumption by 2030. To ensure the security and affordability of electricity and heat generation, the state is poised to support renewable energy sources that do not incur ...
