

Who is Wartsila Energy?

Wartsila Energy is at the forefront of the transition towards a 100% renewable energy future. We help our customers and the power sector to accelerate their decarbonisation journeys through our market-leading technologies and power system expertise.

What does Wartsila do?

Learn about what we do in the marine market where Wartsila is a global leader in complete lifecycle power solutions. Wartsila is a global leader in innovative technologies and lifecycle solutions for the marine and energy markets. Why Wartsila?

Will Wartsila provide generating equipment for a New Mexico power plant?

HOUSTON, Feb. 22, 2024 (GLOBE NEWSWIRE) -- Technology group Wartsila will supply the generating equipment for an 18 MW expansion to an existing power plant in New Mexico, USA, utilizing reciprocating internal combustion engine (RICE) technology.

When did Wartsila start producing diesel engines?

The sawmill was soon taken over by industrialist Nils Ludvig Arppe, who built ironworks in the premises. In 1898 the company was renamed Wartsila Ab. In 1938 the diesel engine era began when Wartsila signed a licence agreement with Friedrich Krupp Germania Werft AG in Germany. The first diesel engine was produced in Turku, Finland in November 1942.

How many cylinders does a Wartsila 46F have?

The largest engine series, Wartsila 46F, produces up to 1,200 kW (1,600 hp) per cylinder and is available in both inline and vee configurations, with up to 16 cylinders for marine use and 20 cylinders for land-based power plants.

Why did Wartsila sign a contract with Farmington?

The contract is with the City of Farmington and was booked as order intake by Wartsila in November 2023. By switching from coal to natural gas, the project aligns with the global trend towards cleaner, lower-carbon fuels.

Wartsila Energy Puh. 050 591 6180 katri.pehkonen@wartsila . Kuvateksti: Wartsila johtaa viisivuotista yhteistyöprojektiä nimeltä WISE (Wide & Intelligent Sustainable Energy). Projektissa on mukana yli 200 suomalaista yritystä, organisaatiota ja tutkimustahoa.

"Our partnership with EVE Energy is one of several strategic measures Wartsila is taking to diversify and strengthen our supply chain in response to industry-wide disruptions ...

W&#228;rtil&#228; Energy vice president for energy storage and optimisation Andrew Tang said: "We are thrilled to work with Amp Energy on this critical project. "This collaboration further demonstrates our commitment to advancing the region's transition to a cleaner, more resilient energy grid, and supporting South Australia's vision to ...

Careful planning of future energy systems will save billions in costs and drive rapid reduction of Co<sub>2</sub> emissions. W&#228;rtil&#228; can support in creating your most optimal power system towards a 100% renewable energy future.

"We are thrilled to work with Amp Energy on this critical project," says Andrew Tang, Vice President of Energy Storage and Optimisation at W&#228;rtil&#228; Energy. "This collaboration further demonstrates our commitment to advancing the region's transition to a cleaner, more resilient energy grid, and supporting South Australia's vision to ...

That doesn't just apply to standalone energy storage projects; GEMS is an EMS from which any type of energy asset can be controlled, including the gas-fired engine power plants which W&#228;rtil&#228;'s legacy business ...

GEMS Digital Energy Platform is the sophisticated solution built to manage this complexity. GEMS is a mature software platform that monitors, controls, and optimises energy assets on both site ...

OverviewHistoryMarine marketEnergy equipment marketServices marketMarket share and competitorsEnginesSustainabilityW&#228;rtil&#228; Oyj Abp, trading internationally as W&#228;rtil&#228; Corporation, is a Finnish company which manufactures and services power sources and other equipment in the marine and energy markets. The core products of W&#228;rtil&#228; include technologies for the energy sector, including gas, multi-fuel, liquid fuel and biofuel power plants and energy storage systems; and technologies for the mar...

3. Less wasted energy: The modelling shows that the use of balancing power allows for enhanced power system optimisation, resulting in 88% less wasted energy due to renewable curtailment ...

W&#228;rtil&#228;'s intelligent energy management system, the GEMS Digital Energy Platform, will ease network constraints by importing electricity at times of peak renewable ...

A two-hour duration battery energy storage project recently commissioned by Wartsila. Image: Wartsila. Power technology firm W&#228;rtil&#228; has initiated a strategic review of its ...

Image: Wartsila. Energy technology firm W&#228;rtil&#228; completed a 125MW/250MWh battery storage project for REV Renewables in California in time to help California ISO (CAISO) deal with record heatwave conditions encountered in September 2022. In an announcement today (21 February), W&#228;rtil&#228; said the battery storage project - called LeConte ...

The Wartsila-Roatan Island Battery Energy Storage System is owned by Roatan Electric (100%). The key applications of the project are electric supply reserve capacity - spinning and grid supportive services. Contractors involved. Roatan Electric is the owner. Wartsila is the technology provider for the project.

The engine can start and ramp up rapidly to support intermittent renewable generation so that the lowest cost cleanest energy technology can become the dominant power source. Key benefits of the W&#228;rtil&#228; 31SG power optimised ...

These cover decarbonisation services, future-fuel enabled balancing power plants, hybrid solutions, energy storage and optimisation technology, including the GEMS Digital Energy Platform. W&#228;rtil&#228; Energy's lifecycle services are designed to increase efficiency, promote reliability and guarantee operational performance.
