Who owns SOCAR fuel stations in Georgia?

The first fuel station of the company under the brand name SOCAR was opened in neighboring Georgia in 2008, before any in its home country. The fuel stations in Georgia are operated by the subsidiary of the company SOCAR Georgia Petroleum.

Where does SOCAR operate?

It operates the country's only oil refinery, one gas processing plant and runs several oil and gas export pipelines throughout the country. It owns fuel filling station networks under the SOCAR brand in Azerbaijan, Turkey, Georgia, Ukraine, Romania, Switzerland, and Austria.

Why does Curacao face energy security issues?

Curacao faces energy security issues not only due to its reliance on imported fuels but also because of the age of its generation infrastructure. Thirty megawatts (MW) of Aqualectra's generation portfolio is beyond its expected service life and the surplus power from the RdK refinery is subject to frequent outages.

How much does energy cost in Curacao?

Energy Snapshot Curacao This profile provides a snapshot of the energy landscape of Curacao, an autonomous member of the Kingdom of the Netherlands located on the coast of Venezuela. Curacao's utility rates are approximately \$0.26 per kilowatt-hour (kWh), below the Caribbean regional average of \$0.33/kWh.

What is Curacao's energy policy?

In 2009, Curacao developed an energy policy document, which sets out general guidance and governing principles for further study of energy issues.⁴ It suggests the goal of reducing energy consumption by 40% by 2020 and encourages the investigation of combining wind power with storage to provide 100% of the island's energy needs.

Does Curacao need electricity?

Like many island nations, Curacao is highly dependent on imported fossil fuels (more than 95% of the island's electricity is generated using petroleum-based fuels), leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.
