

Who is socomec?

Founded in 1922, SOCOMEC is an independent industrial group with a workforce of 4200 experts spread over 30 subsidiaries in the world. Our core business: the availability, control and safety of low voltage electrical networks serving our customers' power performance. In 2023, SOCOMEC posted a turnover of 843 MEUR.

What services does socomec offer?

Socomec is committed to delivering a wide range of value-added services to ensure the reliability and optimisation of end-users' equipment: performance assessment of the electrical installation throughout the life cycle of the products via analysis of data transmitted by connected devices.

What makes socomec different?

As a manufacturer with complete control over its technological processes, Socomec is quite unlike the more general providers. The Group is constantly improving its fields of expertise in order to offer its clients increasingly customised, appropriate solutions.

What makes socomec a good company?

Working relationships are based on the idea of partnerships and respect for shared ethics. Through the company's commitment to achieving harmonious, lasting development, Socomec fully embraces its responsibilities not only towards its shareholders, employees, customers and partners, but also towards society as a whole and its environment.

How many subsidiaries does socomec have?

With around 30 subsidiaries located on all five continents, Socomec pursues international development by targeting industrial and service applications where the quality of its expertise makes all the difference.

What can socomec do for You?

Socomec solutions, from current sensors through to a wide choice of innovative scalable software packages are driven by experts in energy performance. They meet the critical requirements of facility managers and operators of commercial, industrial and local authority buildings for: monitoring and detecting insulation faults.

JSR Micro N.V., based in Leuven, Belgium, is a subsidiary of JSR Corporation is a multinational leading materials supplier in a variety of technology-driven markets. Through close and timely collaboration with its partners, JSR offers its customers a competitive advantage based on leading edge technologies, consistent high quality and a balanced cost of ownership.

Power availability is the cornerstone of critical applications - including Data Centres, hospitals and airports - but to guarantee availability it is vital to design an electrical architecture specifically for optimized performance. In the absence of a single, universal technical standard, it is possible to identify trends in the construction of Single Line Diagrams.
