Inverter Quality: Another important component is the inverter, which takes care of the conversion process of DC power from the solar panels into AC for your devices. Using a good quality inverter means that the process of converting the power becomes as efficient as possible with minimum losses of energy.

A side from the solar panels, solar companies have many other manufactured products that are required to make solar energy systems work smoothly, like solar inverters, batteries, combiner boxes, and racking and tracking structures. Having a solar manufacturing sector makes a big difference in supplying affordable solar
