

# Solar energy costs Ivory Coast

Who financed the Ivory Coast solar power station?

The 75.6-million-euro (\$82.1-million) cost of building the solar power station was financed by Ivory Coast, a German loan and a European Union grant. "This is the result of the EU's long-standing commitment to the renewable energy sector, with almost 140 million euros since 2017," EU ambassador to Ivory Coast Francesca Di Mauro told AFP.

How many MW is a solar power plant in the Ivory Coast?

The authorities in the Ivory Coast have completed a 37.5 MW solar plant, with a second development phase now underway to increase its capacity to 80 MW. The first phase of a solar power plant in the northern part of the Ivory Coast has been inaugurated.

How much solar power does Ivory Coast have in 2023?

Ivorian Energy Minister Mamadou Sangafowa Coulibaly has also revealed plans to expand the capacity of the Boundiali plant to 80 MW. According to the International Renewable Energy Agency (IRENA), Ivory Coast had 46 MW of installed solar at the end of 2023. This content is protected by copyright and may not be reused.

How much does the Ivory Coast electricity project cost?

The project, which has a total cost of EUR75.6 million (\$81.8 million), is expected to power 70,000 homes, saving 60,000 tons of CO2 equivalent per year. It is creating more than 300 direct and indirect jobs during construction. The project is part of efforts to diversify electricity production in the Ivory Coast.

Where is Ivory Coast's first solar power plant located?

Boundiali (Ivory Coast) (AFP) - The sun beats down from a cloudless sky on the town of Boundiali, where Ivory Coast's first solar power plant embodies the drive to embrace clean energy without abandoning fossil fuels. Issued on: 07/06/2024 - 11:51 Modified: 07/06/2024 - 11:49

Does Ivory Coast need fossil fuels?

By 2030, Ivory Coast has pledged to increase its share of renewable energy to 45 percent, including nine percent solar, and to reduce its greenhouse gas emissions by 30 percent. Fossil fuels however still play a key role. The West African nation recently discovered two huge oil and natural gas deposits.

Ivory Coast's energy mix is currently dominated by gas-fired power plants (70%) and hydroelectric plants (30%). Future commitments and challenges. Côte d'Ivoire has committed to increasing its share of renewable energy to 45% by 2030, including 9% solar energy, and to reduce its greenhouse gas emissions by 30%.

Abidjan, Ivory Coast, is a highly suitable location for solar photovoltaic (PV) power generation due to its relatively consistent average daily energy production per kW of installed solar across all seasons. In this city, the average kWh per day per ...

Ivory Coast is aiming for an energy mix in which 42% will come from renewable energy by 2030. To help it achieve this goal, EDF signed a concession contract with the Ivorian government in ...

Meanwhile, the Ivory Coast inaugurated the 37.5 MW Boundiali power plant, which is the first photovoltaic solar plant in the country and the largest in West Africa. "In five years, the share of solar energy will be 9%," stated the Prime Minister of Ivory Coast, Robert Beugr&#233; Mamb&#233;, during the power plant inauguration on April 24.

Solar capacity in Ivory Coast far behind neighbouring countries. But despite the change in political thinking and the more favourable economic conditions, there are still hardly any solar plants in C&#244;te d'Ivoire. In 2020, solar power accounted for just 13 megawatts of the total power generation capacity of 2,232 megawatts. That is 0.58 per cent.

Ivory Coast's Solar Revolution Gains Momentum. With an estimated daily direct normal irradiation of 3,510 Wh/m<sup>2</sup>, Ivory Coast is attracting interest from an array of renewable energy developers. Developed under a public-private partnership, the 37 billion CFA Francs plant by Kong Solaire is set to commence operations in Q3 2026.
