

How effective is solar energy in Sudan?

Solar Energy in Sudan appears to be very poor, despite having an average sunshine duration of about 9 hours a day. Most of the solar technology installations in the country are Photovoltaic (PV), with a total installed capacity of about 2 MW (Rabah, A.A., et al., 2016, p.7).

Are solar power generators a problem in Sudan?

An economic comparison between three types of electricity generators; stand-alone PV modules (50 Wp), two imported gen-sets (0.5, 2.4 kW), and a small mini-grid system (313 kW peak) proved challenging in adopting PV systems in Sudan (Dongola and Northern Kurdufan).

Should solar energy be adopted in The Sudan?

Theoretically, technically, and long term, there are huge potentials for solar energy adoption in The Sudan. The present transition phase requires a serious practical focused strategy to make positive contributions to its energy sector and development altogether.

Who is solarika energy?

Solarika Energy Ltd is a company committed to providing reliable, quality, innovative solar solutions. We provide solutions for all sectors and applications, including residential, commercial, industrial, community, agriculture, education, health, and hospitality.

Khartoum -- Sudan was one of the first nations to understand the importance of renewable energy. In this bid, the country took good steps in early 1980s for the development of rural areas via the ...

Solar energy currently makes up less than 0.1% of Sudan's energy supply; but there is immense potential because there is an average of 8.5 to 11 hours of sunshine per day [Citation 46]. Figure 6 compares solar energy ...
