How do I choose a solar battery storage location?

**Space Utilization:** Consider whether the chosen location can be efficiently used for solar battery storage without disrupting your daily activities or the aesthetics of your home. **Wiring Distance:** Keep the distance between your solar panels and battery as short as possible to minimize energy loss during transmission.

Where should solar batteries be stored?

The ideal place for a solar battery storage system to be installed is in the house, close to the consumer unit. Example locations are a hall cupboard, an understairs cupboard, the utility room and so on. If, however, this option isn't available then there are two main alternatives: Garage or loft. Is it safe to put solar batteries in the loft?
