São Tomé is located near a large body of water (e.g., ocean, sea, or large lake). This section reports on the wide-area average surface temperature of that water. The average surface water temperature in São Tomé is gradually decreasing during May, falling by 3°F, from 83°F to 81°F, over the course of the month.

The two islands of Sao Tome and Principe hover just above the equator, 250km off the coast of Gabon. While other tropical paradises have been taken over by resorts, Sao Tome and Principe remain thankfully much as they were when the Portuguese first discovered them in 1470, save for the addition of the odd cocoa plantation and charmingly crumbling colonial town.

São Tomé and Príncipe is not a cheap destination - though it's far more reasonable than other African island idylls like Mauritius or Seychelles; for a top-notch hotel, think EUR300 a night rather than EUR3000. On a tight budget, you might be able to get by on EUR100 per person per day - or even a little less.
