

Solar panel and battery price inia Palestine

Does Palestine have a potential for solar power?

The Palestinian territory has a high potential for solar power generation, as it receives around 3,000 hours of sunshine per year. As a result, the Palestinian Authority is looking to attract investments in the renewable energy sector. Inauguration of the solar power plant in a school in Beit Hanina, Jerusalem.

How much electricity does Palestine use?

Electricity supply and demand According to the Palestinian Central Bureau of Statistics (PCBS), the total electrical energy consumption in Palestine in 2019 was reported to be 5,929.5 GWh. This quantity is almost entirely imported from outside sources, mainly from the Israel Electric Corporation (IEC), as shown in Table 1.

Where is electricity supplied in Palestine?

Table 1: Sources of Electricity in Palestine Based on Yearly Consumption (PCBS 2019). The West Bank is mainly supplied by three 161/33 kV substations: one in the south close to Hebron; another one in the central West Bank, near the town of Salfeet, close to Nablus; and a third in the northern part of Jerusalem.

Can Palestinians achieve 10 percent of electricity production from renewable sources?

The Palestinian Energy Authority issued a renewable energy strategy in 2012 that aims to gradually achieve 10 percent of electricity production from renewable sources by the end of 2020. According to the strategy, this goal can be achieved if certain prerequisites are attained.

Why is energy demand so high in the Palestinian territories?

Energy demand in the Palestinian territories is growing rapidly while the availability of natural resources is scarce, making the power sector almost entirely dependent on energy imports from neighboring countries.

Palestine has one of the highest solar irradiation in the region with an average daily solar irradiation of 5.4-6 kWh/m²/day and more than 3000 h of sunshine per year ...
