How much does a DIY solar panel cost in France?

The average price for a DIY kit including 16 panels is around EUR6,250. These are generally capable of producing 64,000Wc (watt cr&#234;te, or 6.4 kWc), which is about 1.5x the power consumption of an average household in France.

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is EUR540 per household per year.

How much does a 3KW solar panel system cost?

A 3kW solar panel system costs around &#163;9,000 to buy and install. If you want to add a battery to this system, it'll push the price up by about &#163;2,000, for an overall cost of &#163;11,000.

Can you have solar panels on a property in France?

Other rules may apply if your property in France is located in certain historic areas. Read more: Can you have solar panels on homes in historic areas of France? You will also need to contact Consuel for an Attestation de Conformit&#233; to confirm your installation is safe to be connected to the main power grid, which costs EUR180.

Is a 3KW solar panel system enough?

A 3kW solar panel system is enough for your household if it approximately matches your annual electricity consumption. But you should always consider getting as large a solar panel system as your roof allows, if you can afford to.

Can a 3KW Solar System power a home?

(In other words, don't expect a 3kW solar system to power an average American home's lights, electronics and appliances.) Most solar energy companies will tell you that 3 kW of power isn't enough to cover all your electricity use, but adding a 3kW solar system to your roof or backyard can still help you lower your utility bills.
