

Photovoltaic (PV) technologies, which convert light into electricity, are increasingly applied worldwide to generate renewable energy. Researchers at the School of Engineering of the Hong Kong University of Science and Technology (HKUST) have developed a molecular treatment that significantly enhances the efficiency and durability of perovskite solar ...

Qatar Solar Technologies (QSTec) announced today that it will be building a polysilicon production facility worth approximately US\$1bn in Qatar. QSTec's plant will manufacture 8,000 MTPY (metric tons per year) of high-purity solar grade polysilicon and is scheduled to commence operations in 2H 2013.

Turkish state energy company Elektrik Uretim Anonim Sirketi has signed a memorandum of understanding (MoU) with Qatar Solar Technologies (QSTec) to develop the nation's solar industry. The companies will explore areas of mutual interest to develop solar industry in Turkey, aimed at having 3GW of installed solar capacity.

Among a variety of renewable energy, solar energy is the most feasible option for wide applications in Hong Kong. In the context of sustainable building design, there are growing interests in the ...

Qatar Solar Technologies (QSTec) has started polysilicon production at its manufacturing facility at Ras Laffan Industrial City with an annual capacity of 8,000 metric tonnes, it announced on Friday.

The findings presented in this dissertation can provide a reference for solar energy development and structural adjustment of Hong Kong in the future, and provides a theoretical basis for local energy policy makers to formulate a reasonable energy policy, and the development goal of subsidies in Hong Kong and solar photovoltaic technology.

We are extremely proud to be working with these organisations to ensure solar power is able to reach every single person in Qatar and provide alternative energy sources to a wide variety of solar applications. QSTec's collaborations ...

Qatar Solar Technologies (QSTec) is a multi-award winning polysilicon manufacturing company. Our polysilicon is at the forefront of industry excellence in terms of cost, quality, and efficiency, and is exported from our strategic location in Qatar to our customers across the world.

foundation for the Middle East and North Africa (MENA) region's solar industry. From our beginnings as a Qatar based polysilicon production company, QSTec has grown significantly. Today, QSTec has international investments in solar companies that span the entire industry ...

The EMC is part of the finished Solar Smart-Grid Project that amplified a total of 1.68MW of new PV systems at different facilities across the QF campus. The project is also the first commercial PV project in Qatar to be ...

The EMC is part of the finished Solar Smart-Grid Project that amplified a total of 1.68MW of new PV systems at different facilities across the QF campus. The project is also the first commercial PV project in Qatar to be granted a grid connection from Kahramaa. 3. Qatar Solar Technologies (QSTec)

QSTec has an 8,400 metric tonne per year (MTPY) high quality, solar grade Polysilicon manufacturing facility in the Ras Laffan Industrial City (RLIC), Qatar that produces top tier polysilicon for use in the world's most efficient solar technologies. In addition to this QSTec has installed ground and rooftop PV installations at its RLIC site ...
