

Soltaro aio2 Singapore

Can a soltaro aio2 be used on-grid?

The Soltaro AIO2 can be used both on-grid and off-grid. It is also capable of being used for an on-grid battery backup. This gives the AIO2 the ultimate flexibility for homes and small businesses who need to ensure they don't lose power when it matters most.

Why should you choose soltaro aio2?

As the AIO2 incorporates MPPT technology, it will always allow you to get the best out of your solar PV system. When grid-connected, or connected to a local micro-grid, the Soltaro AIO2 can be connected in parallel. This allows your system to be modular and expandable as your energy storage needs change. The batteries are also modular.

Can a soltaro aio2 be connected in parallel?

When grid-connected, or connected to a local micro-grid, the Soltaro AIO2 can be connected in parallel. This allows your system to be modular and expandable as your energy storage needs change. The batteries are also modular. You can add more battery storage at any time to expand your storage capacity should your needs change.

Can soltaro aio2 be AC coupled?

Soltaro AIO2 can also be AC Coupled, which very few products are capable of doing. AC Coupled mode adds Soltaro AIO2 to your existing solar systems; this method is less energy efficient and not all the emergency power features are supported in this mode.

What is a soltaro battery?

Soltaro offers two flagship battery products in Australia, the AIO2 and the newer AIO3. Both series feature LiFePO4 (LFP) chemistry with over 10,000 cycle life, ensuring long-term durability. These batteries are All-in-one Energy Storage Systems (ESS) designed to cater to both on-grid and off-grid applications.

Who is soltaro solar?

Soltaro is an Australian owned and operated energy storage company with a background in importing and wholesaling various brands of panels and inverters. In 2016, Soltaro opened its own solar battery manufacturing and assembly facility in Wuxi, China.
