

What is South Sudan's role as a power utility?

Its role as a power utility is expected to intensify as programmes to increase electricity access in South Sudan are implemented. It is proposed under the Electricity Bill 2015 as the regulatory entity for the electricity sector in South Sudan. It would function as the energy regulator whose functions would include the creation of regulations.

Why is South Sudan facing a serious energy crisis?

South Sudan faces a serious energy crisis due to a number of factors, including devastating conflicts (e.g. 1955-1972, 1983-2005 & 2013-present) and reliance on the fossil fuel source. The country has the lowest energy consumption rate in Africa and the highest cost of producing energy (World Bank, 2016).

Why is energy infrastructure underdeveloped in South Sudan?

Partly due to the civil wars (e.g., 1955-1972, 1983-2005 & 2013-present), energy infrastructure remains very underdeveloped in South Sudan. Despite a peace agreement in 2015, which has been revitalized recently, conflict has impeded the country's effort in transitioning to renewable energy.

How does inadequate grid infrastructure affect access to electricity in South Sudan?

Inadequate grid infrastructure in South Sudan complicates access to electricity. The one in Bentiu, like the ones in Malakal and Kodok, has been destroyed by the 2013 civil war. 2.5. Implications of inadequate energy access  
The implications of an inadequate access to electricity by the population are multifaceted.

Is result based financing a solution to South Sudan's energy crisis?

Result Based Financing (RBF) to accelerate access to energy services, an instrument commonly used in other markets to bridge the affordability gap, is also lacking in South Sudan. The energy sector's policy and enabling regulatory environment is still in its formative stage, especially for the off-grid sector.

How does lack of electricity affect business in South Sudan?

Specifically, over 75% of firms surveyed in South Sudan complained that lack of energy hinders business operation. Second, lack of electricity drives up costs as businesses and families try to produce their own power, which is extremely expensive.

The 400kV Olwiyo-Juba Transmission Line picks up power from Olwiyo Substation, which is already operational at 132 kV. The Olwiyo-Juba 400 kV power interconnection which is meant to interconnect the power grids of Uganda and South Sudan commenced around 2015 when the Northern Corridor infrastructure initiatives were initiated by ...
