Our expert installation teams cover the whole of the UK meaning you can plug into cheaper convenient charging at home with our rapid installations. If you pair your EV charger with a Spark solar and battery system you can save even more by fuelling your car with free energy from the sun, all managed from an integrated PureDrive smartphone app.

On top of that, numerous tax benefits - from accelerated depreciation to straight-up tax credits - make commercial installations remarkably low-cost solar investments. Commercial solar also helps owners qualify for green credentials, and satisfies social responsibility guidelines. Get with a Spark Solar rep to get a commercial solar quote now.

Instead, we have curated a range of panels, batteries, and inverters for their blend of optimal performance and assured quality. We have chosen products that allow us to ensure that every system Spark installs is excellent as standard, seamlessly blending high-quality solar into a bespoke system that is tailored exclusively to you.

With Oikocredit's support, Spark will be able to give low-income people in the Democratic Republic of Congo, Kenya, Malawi, Liberia, Mali, Niger, Nigeria, Senegal, Uganda, Zambia and others both access to clean energy and a path to ownership of off-grid solar products that can be extended to fit users' growing energy needs.

That's why BrightLife distributes Spark solar home systems to communities across the country. This is a challenging task. Tough geographic terrain and a low-income customer base make the country a difficult market. But BrightLife and Spark have teamed up to ensure that rural homes have access to affordable and reliable power provided by ...

Solar panels catch photons from the sun and use their energy to push electrons to your main breaker panel. Solar panels have no moving parts and are virtually maintenance free. Once the solar systems is properly
