

Sri Lanka solar package in karachi

How much does a solar system cost in Sri Lanka?

Residential solar installations in Sri Lanka typically start at around 500,000 LKR to 750,000 LKR for basic setups. With a budget of 500,000 LKR, you can generally expect a solar system producing approximately 2 kW to 3 kW of power. If you have a budget of 750,000 LKR, the system size might range from about 3 kW to 5 kW.

How do solar panels work in Sri Lanka?

Solar panels convert sunlight into direct current (DC) electricity. The efficiency of these panels can vary, but in Sri Lanka, with its average solar irradiation of around 4.5 to 5.5 sun hours per day, solar panels can generate significant amounts of electricity. High-quality solar panels often use materials like P-type and N-type silicon cells.

What is the average payback on solar power in Sri Lanka?

The average payback on solar power in Sri Lanka is 5 years. After this payback period, you are earning money on your roof. Best choice when your bill is high and you have limited roof space. Zero your bill if you generate electricity as much as you consume. The energy you consume - Energy generated through solar = what you pay.

Why should you choose a residential solar system in Sri Lanka?

Adopting a residential solar system in Sri Lanka can lead to substantial savings on electricity bills, enhance energy security, and contribute to environmental sustainability. Whether opting for an on-grid, off-grid, or hybrid system, working with certified professionals is crucial to ensure a properly designed and installed system.

How long does a solar installation last in Sri Lanka?

The payback period for industrial solar installations in Sri Lanka typically ranges from 3 to 4 years. Efficient project designs and use of high-quality components contribute to favorable ROI. The upfront costs for a factory-sized solar installation can be significant.

How much LKR do you earn on solar panels?

Earn LKR 37/- per unit* for the energy you generate. Continue to pay the electricity bill as it is. Sunlight falls on solar panels during daylight hours.
