How much energy does Senegal have?

As of April 2020, the energy sector in Senegal has an installed capacity of 1431 megawatts (MW). Energy is produced by private operators and sold to the Senelec energy corporation. According to a 2020 report by the International Energy Agency, Senegal had nearly 70% of the country connected to the national grid.

What is Senegal's energy policy?

The IEA's Energy Policy Review of Senegal 2023, published today, finds that energy is at the heart of Senegal's 2035 strategy for accelerating sustainable development and economic growth known as the Plan Sénégal 2035, or the Emerging Senegal Plan.

Can Senegal achieve its broader economic objectives?

Senegal's significant efforts to develop its energy sector and deliver energy access to more people are laying important groundwork for the country to achieve its broader economic objectives, according to a new report from the International Energy Agency (IEA).

Does Senegal need electricity?

The Manantali Dam in Mali generates some of Senegal's electricity needs. Senegal's major source of electricity is diesel. The rest is mostly coal and hydroelectricity. Renewables should make up 30% of the country's energy mix and Taoudeni will supply half.

How has Senegal reformed its energy sector?

Since the launch of the Plan Sénégal 2035, Senegal has adopted reforms designed to attract foreign investment in its energy sector and boost participation from the private sector, while leveraging significant support from development finance institutions.

Is Senegal a good country for energy transitions?

Senegal is a strong advocate for just energy transitions. The country has already met the wind and solar targets it established for 2025 under its most recent Nationally Determined Contribution to the Paris Agreement, and it has joined the Global Methane Pledge to reduce the world's methane emissions 30% from 2020 levels by 2030.
