

State Grid microfilm going home for the New Year

Why is National Grid launching the Great grid upgrade?

National Grid is working diligently towards this objective, launching the Great Grid Upgrade - the largest overhaul of the electricity grid in generations.

How much is National Grid investing in 2025 & 2029?

National Grid is investing over £30bn between 2025 and 2029 in projects that support the UK's net zero and power decarbonisation targets. Do you have a question about The Great Grid Upgrade? Read our frequently asked questions For almost 90 years the UK's electricity grid has served us well.

What is the Great grid upgrade?

The Great Grid Upgrade not only includes 17 new offshore and onshore transmission projects over the next ten years, but will also modernise existing infrastructure - some of which was built over half a century ago. Your new guide to the best writing on ideas, politics, books and culture each weekend - from the New Statesman.

What's new in the UK's energy grid?

This was the year we announced the largest overhaul of the grid in generations, which will enable millions of UK homes and businesses to use renewable energy to power the things they need and love in years to come. We've also connected huge low carbon power projects to the grid, and we've released gigawatts of capacity in the pipeline.

Will the National Grid raise £20bn over the next 40 years?

Ofgem says it has agreed to allow the National Grid to raise an additional £20bn over the next 40 years from customer bills to pay for the huge upgrades the grid needs. Customers have seen household prices soar over the last year following the invasion of Ukraine by Russia and a run-on gas.

Should Britain deliver the Great grid upgrade?

Delivering the Great Grid Upgrade will not only capture the economic opportunity of the energy transition, but also keep Britain on target to achieve its climate goals. There is no time to lose. [See also: Net zero's dirty secret]
