

# Summary of Microgrid Demonstration Projects

What is a microgrid report?

This report provides (1) an overview of the microgrid planning, assessment, and design process for DoD installations and (2) is a resource for energy managers, policymakers, contractors, and other stakeholders involved in microgrid projects.

What is a microgrid project?

The primary goal for microgrid projects is to increase the energy resilience and enhance the ability to serve an installation's electrical loads during a contingency situation.

Is a microgrid possible?

The PrInCE Lab microgrid project demonstrated that it is possible to realize a microgrid by adopting components and equipment originally developed for classical distribution network applications. However, the adoption of these components made their integration into a microgrid structure more complex than the expected.

What should be included in a microgrid demonstration period?

Demonstration of the microgrid includes the final performance measurement and validation procedures. The microgrid demonstration period should include a variety of scenarios to demonstrate the functionality of the system. High level examples are listed below.

What is a microgrid solicitation?

The microgrid solicitation was a design-build project and was awarded to a joint venture of Schneider Electric and Black and Veatch in 2016. Engineering design for the project was completed in 2017, and construction started in 2018. Construction completion and project commissioning are both expected in 2019.

What is a microgrid assessment process?

The process provides an overview of the basic steps and high-level information as well as analysis that is required for microgrid assessment. It is not intended to capture every detail of a project but rather to provide a general overview.

o The project will be supported by research work that has been underway for more than 10 years at the Institut de recherche Hydro-Québec (IREQ) o The lessons learned from this project will ...

The project showcases the integration of renewables, energy storage, electric vehicle charging loads, and intelligent controls in a microgrid environment. Project outcomes support the growth ...

The Office of Electricity (OE) has a comprehensive portfolio of activities that focuses on the development and implementation of microgrids to further improve reliability and resiliency of the grid, help communities better

# Summary of Microgrid Demonstration Projects

prepare for future ...

The CE.D.E.R.-CIEMAT centre is a demonstration centre for the TIGON project and houses a microgrid with hybrid AC/DC architecture within its facilities. Currently, in the second active year of the project, all generation, ...

This paper builds up a microgrid cluster model based on the demonstration project of Sanli Yizhong, covering photovoltaic, fan, gas turbine, fuel cell, etc, and the operation status of grid ...

The EU More Microgrids Research Project A follow-up project titled More Microgrids: Advanced Architectures and Control Concepts for More Microgrids within the 6th Framework Programme ...

To support the microgrid demonstration projects described pre-viously, U.S. federal, state, and local policies play a vital role. Support for microgrids comes from research and development ...

M-CSP Microgrid Cloud based Sharing Platform MEMG Multi-Energy Micro-Grid METI Ministry of Economy, Trade and Industry MILP Mixed-Integer Linear Programming MG Micro-Grid MNA ...

Many of the successful microgrid demonstration projects have used customer sites downstream of one meter, where there are fewer regulatory barriers. Maxwell Air Force Base, Illinois Institute ...
