

Sunny central storage up Tanzania

What is sunny central storage?

The Sunny Central Storage is the central component of the SMA system solution for integration of large-scale storage systems. It is designed to compensate fluctuations in solar energy generation and offers comprehensive grid management services, e.g., automatic frequency control.

Does sunny central storage work with SMA hybrid controller?

Thanks to its wide DC voltage range, it is compatible with various types of battery technologies. The Sunny Central Storage is designed to work with the SMA Hybrid Controller and is also available as turnkey solution with medium-voltage block.

How long does Sunny Central up last?

True 1,500 V DC technology and our improved intelligent cooling system OptiCool(TM) ensure smooth operation even at extreme temperatures and with a service life of 25 years. As a global medium-voltage solution, the Sunny Central UP is the core of our turnkey system for PV power plants.

Why should you choose sunny central up?

SMA's most powerful system with an output power of up to 4,600 kVA for large-scale PV plants offers the advantage of 17% to 54% fewer inverters. With the Sunny Central UP, you benefit from significant cost reductions on transportation, installation, commissioning and service.

As a global medium-voltage solution, the Sunny Central UP is the core of our turnkey system for PV power plants. It has been developed for worldwide use and complies with the highest international security standards. The Sunny Central UP Plug & Play System combines central inverter, transformer and storage solution in a compact unit.
