

Synenergy global Vatican City

How much solar energy does the Vatican produce a year?

Thanks to a unique photovoltaic plant installed on the roof of the Vatican Audience Hall, the Papal State has been producing 300 MWh of solar energy every year since its installation in 2008. The project was planned and managed by BayWa r.e. with the PV modules, inverters and its installation donated by solar technology provider, SolarWorld.

How can synenergy help ensure business sustainability post-implementation?

Development of in-house capability to ensure business sustainability post-implementation. The workplace is a complex jigsaw puzzle waiting to be revealed, and we at Synenergy help make sense of the apparent disorder. It requires all of our experience, creativity and knowledge as no two challenges are the same.

Can the Vatican save on light?

By generating its own energy, the Vatican can save on light. This is especially relevant in a context where the price of light is a constant worry for many. The use of solar energy also improves the State's energy efficiency, enabling a more responsible and sustainable light consumption.
