

Why did a tanker carry Iranian oil to Syria?

LONDON, Dec 9 (Reuters) - A tanker carrying Iranian oil to Syria turned round in the Red Sea to head away from its original destination after the fall of Syrian President Bashar al-Assad. Syria's 13-year civil war crippled the country's energy sector, making it highly reliant on imports from Iran. Below are facts about Syria's energy sector.

How much oil does Syria produce a day?

**\*\*Prior to sanctions, Syria produced some 383,000 barrels per day (bpd) of oil and liquids, according to previous analysis by the U.S. Energy Information Administration (EIA). \*\*Oil and liquid production fell to 40,000 bpd in 2023, according to separate estimates from the Energy Institute.**

What happened to Suncor Energy in Syria?

**\*\*Canada's Suncor Energy Inc suspended its Syria operations in 2011. Its primary asset is the Ebla development located in the Central Syrian Gas Basin covering more than 300,000 acres (approximately 1,251 square kilometres). The gas field was producing 80 million cubic feet of natural gas per day.**

Does Russia have a long-term presence in Syria?

The fall of Assad's regime has also thrown into question Russia's long-time presence in the country. "What happened surprised the whole world and we are no exception here," Peskov said. As the Kremlin finds itself down a key ally, Peskov said Russia will discuss its presence in Syria with those who eventually assume power.

Why did Israel strike chemical weapons sites in Syria?

Israel said it had struck suspected chemical weapons sites in Syria to prevent them from falling into "the hands of extremists." The United States ordered more than 75 strikes on ISIS camps to stop the terrorist group from taking advantage of the upheaval.

Will Syria build a bright future?

Parliament added in a statement that the will of the Syrian people "stands above all else," and that it will "support the people's desire to build a new Syria with a bright future where the law and justice prevail for all, without discrimination."

The Energy Storage Summit USA is the only place where you are guaranteed to meet all the most important investors, developers, IPPs, RTOs and ISOs, policymakers, utilities, energy buyers, service providers, consultancies and technology providers in one room, to ensure that your deals get done as efficiently as possible.
