Are greenlinx batteries any good?

The Greenlinx batteries have very limited performance reduction compared to all other domestic home solar Lithium batteries; they remain at full capacity down to zero degrees. In addition, each battery has superior charge rate of 40Amps and discharge rates of 60Amps which means faster charge and discharge capability.

Who makes greenlinx batteries?

Greenlinx have developed a range of batteries to push the technical boundaries of performance, temperature management, monitoring and technical support. Greenlinx are exclusively distributed by Infinity Innovations Ltd. in the UK and Europe. While they are quite recent to the UK market they are by no means new to the battery storage industry.

How many greenlinx batteries can be connected?

Modular - from 1 to 8 Greenlinx batteries can be connected. We are online now! Need help? Call us now on 0800 156 0191 Do you know exactly what you are looking for? Yes! Don't worry, we're here to help either way! The Lux Power energy monitoring system can be accessed via a Web hub or phone apps.

Why is hanchu 3.2kw a good battery?

The monitoring of each battery via App and Web portal allows for future technical support, and future upgrades should it be needed. Due to Hanchu 3.2kW using HPD lithium to achieve market leading charge and discharge levels it also allows the battery to be smaller than other batteries.

Can a greenlinx system be connected to a standalone system?

Please note this is not a standalone product, it can only be connected to a system that already has Greenlinx. This price includes installation. If you would like a quote for this system, please call 0800 156 0191 or simply answer these few questions and we will get back to you with your finance options.

Ofgem estimates the typical household in the UK uses 2,900 kWh a year so a 3.2 kWh would be perfectly fine. You are ideally looking for a battery, or a collection of batteries, that will keep your home going after the sun goes down. The battery slowly drains overnight and is then charged up by the solar panels the next day.
