

# The boy who harnesses the wind makes his own wind turbine

Is the boy who harnessed the wind a true story?

“The Boy Who Harnessed the Wind” is a true historical event. The co-author of this book, William Kamkwamba, was the young teenager in this story. In 2001, William Kamkwamba built a wind turbine outside his house in the village of Wimbe which he made of blue gum trees, bicycle parts, and materials he collected from a dumping ground.

Who is the boy who harnessed the Wind by William Kamkwamba?

The Boy Who Harnessed the Wind is an autobiography by William Kamkwamba, in which Kamkwamba recounts his impoverished childhood in Malawi and his eventual creation of a windmill. Kamkwamba becomes fascinated with the wind and harnessing its power. He reads an old engineering book called Using Energy, which inspires him to build a windmill.

Who wrote the boy who harnessed the wind?

Title of the Book: The Boy Who Harnessed The Wind The authors of this book: William Kamkwamba and Bryan Mealer Summary: “The Boy Who Harnessed the Wind” tells the inspiring true story of William Kamkwamba, a young boy from Malawi who, facing poverty and famine, uses his cleverness to build a windmill from scrap materials.

Does the boy who harnessed the wind have light?

Upgrade to unlock the analysis and theme tracking for all of The Boy Who Harnessed the Wind! Having light in the house is definitely a benefit for the Kamkwambas, but it comes with risks. William was forced to use wire he found in the trash or the scrap yard, meaning that most had lost their plastic insulation and could potentially start a fire.

How did William Kamkwamba learn to build a windmill?

Young Malawian William Kamkwamba was 14 years old when he taught himself how to build a windmill from spare parts and scrap. He borrowed an energy book from a library, where he found the rough plans to put together an electricity generator to harness the energy from the wind, and provide energy to power lights and radio for his family home.

What if William could build his own wind turbine?

Other textbooks, Explaining Physics and Using Energy assisted in his determination to harness the wind and Generate His Own Electricity. If William could build his very own wind turbine, then he would have LIGHTS! Neither drought, flood, famine, dropping out of school, nor poor English skills would stop his pursuit toward greatness.
