

Tokelau bechtel energy inc

Can a solar array power Tokelau?

Solar Array's seen on the three tiny islands of Tokelau to completely produce solar power energy. The renewable energy system comprising of solar panels, storage batteries and generators running on biofuel derived from coconut will generate enough electricity to meet 150% of the islands' power demand.

Where does Tokelau get its electricity from?

Except for that part of the electricity supply provided by Solar Photovoltaic (PV) to TeleTok facilities on all three atolls and the University of the South Pacific (USP) facility on Atafu, essentially all energy in Tokelau currently is from imported petroleum.

Could Tokelau be the world's first renewable nation?

Solar power plants and coconut biofuel-powered generators switched on in Tokelau has made the islands the world's first truly renewable nation.' Imagine a place where the only energy to be found is clean, reliable solar power. Solar Array's seen on the three tiny islands of Tokelau to completely produce solar power energy.

What is Bechtel Energy Technologies & Solutions?

At Bechtel Energy Technologies & Solutions (BETS), we provide value-added insights to our clients on every stage of their projects, from early engagements to operations. We help our clients identify their energy needs, collaborate on their long-term strategy, and optimize their project development--sustainably and cost-effectively.

Why should you choose Bechtel Energy Technologies & Solutions?

Carbon capture, hydrogen and circular economy solutions, including bioenergy, can help you meet the growing demand for downstream products in a cleaner and more sustainable way and our Bechtel Energy Technologies & Solutions team are continually are focused on the application of proven and emerging technologies to lower carbon emissions.

What is Tokelau's energy policy?

The primary focus of the policy is the desire of Tokelau to become self-reliant in energy through a combination of renewable energy and energy efficiency measures.
