

Trailer pulling the generator blades

How do I choose a trailer for my diesel generator?

When selecting a trailer for your diesel generator, it's essential to understand two critical specifications: GVWR and GAWR. GVWR (Gross Vehicle Weight Rating): This is the maximum total weight that your trailer can safely carry, including the weight of the trailer itself, the generator, fuel, and any additional equipment.

What is a trailer mounted diesel generator?

When it comes to portable power solutions, trailer mounted diesel generators are a top choice for many commercial and industrial applications. These robust units offer mobility, reliability, and versatility, making them ideal for various situations.

How do you mount a generator on a travel trailer?

RV Bumper-Mounted Generator and Cargo Carrier Tray Kit Many travel trailer owners choose to mount their generator on their bumper, using a bumper-mounted cargo tray. It's essentially a large platform that you mount to the rear bumper of your trailer, and then you secure the generator on top of the tray.

How much can a generator trailer carry?

The trailer below is based on our Polycube trailer, this trailer in particular has been manufactured in a variety of sizes to suit many types of generators with a maximum laden weight of 3000kg. The unladen weight of this generator trailer is 545kg meaning you can carry a generator weighing up to 2,455kg in total.

Should you put a generator on a trailer?

More importantly, when the generator (a heavy piece of equipment) is mounted on the front of the trailer instead of the bumper, it's far more secure. This also makes driving more smooth and keeps the weight of your trailer more balanced.

What is a trailer-mounted generator?

As the name suggests, a trailer-mounted generator is attached to a custom trailer and ball hitch, making it capable to tow the unit from location to location as needs arise.
