

Trinidad and Tobago company profile for solar energy company

What is the future of solar energy in Trinidad and Tobago?

The gradual shift from energy generation using conventional sources, such as coal and natural gas, to clean energy is expected to drive the Trinidad and Tobago solar energy market. Various government initiatives are expected to create a significant amount of opportunities in the market.

Should Trinidad & Tobago invest in wind and solar energy?

Tapping into Trinidad & Tobago's vast wind and solar resources for domestic electricity consumption would allow it to export more natural gas and use the extra revenue to finance its broader, long-term energy transition plans. Why do financial institutions have a role to play in energy transition?

What is the electricity generation mix in Trinidad and Tobago?

As of 2020, the electricity generation mix in Trinidad and Tobago is dominated by fossil fuels such as natural gas, coal, and diesel. However, increasing demand for clean and stable energy is expected to be the primary driver for the solar power generation market in the country.

How many photovoltaic systems are there in Trinidad & Tobago?

Two 2-KW of-grid photovoltaic (PV) systems are in operation at the University of Trinidad & Tobago and the Trinidad & Tobago Electricity Commission. Twenty-one 1-KW PV systems had also been installed at schools around the country by 2020. The electricity generation mix in Trinidad & Tobago is still dominated by fossil fuels.

Are there green energy sources in Trinidad & Tobago?

As there currently are not many green energy sources available in Trinidad & Tobago, local businesses must work towards developing their own and place additional emphasis on energy efficiency and conservation.

Can a multisource financing facility transform Trinidad & Tobago's energy sector?

The company is publicly listed on the Trinidad & Tobago Stock Exchange. The bank and the Minister of Energy and Energy Industries discussed a multisource financing facility that could have a transformative impact on the region's energy sector. The facility would combine various sources of financing, including from the private sector.
