Portfolio Status: ~50 MW total capacity, ~50 MW of tangible development pipeline. Nala Renewables is a 50/50 joint venture between Trafigura and IFM Net Zero Infrastructure Fund. Nala benefits from a global network combined with a unique business-building approach and renewable energy expertise.

Could geothermal power power a small island?

While most small islands will have to rely on intermittent solar or wind power, others are blessed with significant geothermal or hydroelectric potential that could provide a baseload electricity supply, and could conceivably follow the paths of Iceland and New Zealand.

A switch to cat food with broth brings several benefits to your furry friend's diet. Primarily, the moisture content in the broth boosts hydration, helping prevent urinary and kidney problems. Additionally, the texture of food with broth is more appealing for felines, making meal times an enjoyable experience.

The United States Minor Outlying Islands are mostly uninhabited, used primarily for scientific research or as wildlife refuges, thus making it difficult to assign typical safety ratings as would be applied to cities or towns.
