

United Kingdom solar panels for industrial units

Can industrial buildings use solar panels?

Industrial buildings have straightforward roof spaces that are ideal for solar panels. Businesses can significantly reduce their overheads by generating their own electricity from solar energy with industrial solar panels. Mypower specializes in installing high yielding and efficient industrial solar panels, which have won awards for their design.

Are solar panels cost-effective in the UK?

Yes, solar panels in the UK are typically cost-effective, especially for large industrial solar PV systems. Alongside the financial benefits of having solar panels, they also significantly reduce a company's carbon footprint and help lessen their effect on climate change.

Who benefits from using industrial solar panels?

Industrial solar panels benefit high energy users the most, but even those with standard energy use see substantial savings. We serve a wide range of businesses, including high energy users like Stewart Golf, a leading manufacturer of golf trolleys.

How much does an industrial solar PV system cost?

Industrial solar PV systems typically cost between £75,000 to £100,000 for a 100kWp/250 panel system. The cost is influenced by factors such as roof type, accessibility, and electrical infrastructure. A detailed survey is usually required for an accurate costing.

Are industrial solar panels cost-effective?

Industrial solar panels in the UK are cost-effective, particularly for large solar PV systems. Yes, they offer financial benefits and significantly reduce a company's carbon footprint, helping lessen their effect on climate change. Industrial solar panels are typically around 1.8m by 1.1m in size.

Do solar panels help save energy?

Industrial solar panels help you significantly reduce, or nearly eliminate, your electricity spend by generating solar energy from the roof of your building. High energy users benefit the most, but even those with standard energy use see substantial savings.
