Why should you buy American made solar panels?

Solar energy is a great way to cut down on power costs, upgrade your home, and reduce your overall carbon footprint. When you buy American made solar panels, you also infuse the economy with money and support local jobs and companies.

Which solar panel is best for a residential roof?

Their most expensive (and most popular for residential use) is the sleek MSE PERC 60 BLACK. It looks nice, performs well, and can work with both residential and commercial roofs. The MSE PERC 60 looks more like the original solar panel technology, with visible cells. It works well for both residential and commercial use.

Where are solar panels made?

Four of the biggest manufacturers are headquartered in China and primarily manufacture equipment there (though one of them, Jinko Solar, does have an American manufacturing facility in Florida). The fifth largest manufacturer is a Canadian company, Canadian Solar, which also has a manufacturing facility in Texas.

1. First Solar. Currently the largest manufacturer of solar modules in the United States, First Solar mostly makes CdTe thin-film products aimed at the utility-scale solar sector.
