Preton Energy Ltd is an oil field engineering services company that is into various oil and gas services being focus on Tank/Vessel Cleaning, Installation and Facility Upgrade, Pipeline/Structural system, Fabrications and other related engineering operation in a manifold that enhances quality service delivery. OUR MISSION

Will Vietnam face an electricity shortage?

Strategic Plan for Transition to Renewable Energy Sources Vietnam's Energy Ministry predicts that the country is likely to face an electricity shortage as the development of new power plants lags behind the country's rapidly growing energy consumption. The government allowed Vietnamese companies to have 100% foreign ownership in the energy sector.

What is Vietnam's energy mix in 2023?

An analysis was conducted on Vietnam's energy mix in 2023, including the examination of power plant capacities and the volume of energy production from fossil sources (coal, gas, oil) and renewable sources (hydropower, solar energy, wind energy, biomass energy).

Does Vietnam have an all-inclusive energy plan?

The National Power Development Plan 8 (PDP8) and the National Energy Master Plan for the Period 2021-2030, Vision 2050, are being drafted roughly at the same time. Vietnam has never had an all-inclusive energy plan that covers energy use in demand sectors. In the past, the power sector was always a top priority.

Does Vietnam use oil as an energy source?

Oil is currently not used as an energy source; gas is imported. Considering the shortage of fossil energy sources and modern global trends (the transition to green energy, which helps reduce greenhouse gas emissions into the environment), it is necessary to diversify the energy sources used by Vietnam's energy system.

Does Vietnam have oil-fired thermal power plants?

Kuwait stands as Vietnam's primary crude oil supply market, constituting nearly 90% of the total. Despite the considerable oil production, the mastery of oil refining technology remains lacking. Consequently, oil-fired thermal power plants in Vietnam face numerous limitations. They generated only 1267 thousand MWh in 2023.
