OverviewMaterials usedAdvantagesProcessingToxicityPhysicsArchitecturesHistoryThe name "perovskite solar cell" is derived from the ABX3 crystal structure of the absorber materials, referred to as perovskite structure, where A and B are cations and X is an anion. A cations with radii between 1.60 Å and 2.50 Å have been found to form perovskite structures. The most commonly studied perovskite absorber is methylammonium lead trihalide (CH3NH3PbX3, where ...
