

# What to do if photovoltaic panels leak when installed

Do solar panels cause roofs to leak?

Solar panels rarely cause roof leaks. When roof leaks occur after solar panel installation, they usually become evident within the first year.

Can you fix a roof leak under solar panels?

When faced with a roof leak under your solar panels, it's important to take immediate action to prevent further damage to your roof and home. Fixing a roof leak under solar panels requires careful attention to safety precautions and following the proper steps to resolve the issue.

Why does my roof leak after installing solar panels?

There are various reasons your roof could leak after installing solar panels. They mostly have to do with poor installation where mounting holes are not sealed properly, the top is incompatible with solar panels, or the roof is old and not designed for solar panels.

How do I know if my solar panel is leaking?

Detecting a roof leak under solar panels may not always be straightforward, but there are several signs that can indicate a problem. Keep an eye out for the following signs: Water stains or discoloration: Look for water stains on the ceiling or walls near the solar panel installation. These stains may appear as dark spots or patches.

How do I seal a leak under my solar panels?

Applying sealant is a temporary solution that can help to seal small gaps or cracks in the roof under your solar panels. This can be particularly useful when you have identified the source of the leak and it is accessible. Here are the steps to follow when applying sealant:

How do you reinstall solar panels after roof repairs?

Reinstall the solar panels: After the roof repairs have been completed, carefully reinstall the solar panels following the manufacturer's instructions or seek professional assistance. Ensure that all electrical connections are properly reconnected and tested before turning the solar panel system back on.
