

Where are the cheapest solar panels

Are cheap solar panels a good idea?

With the cost of living crisis ongoing, and the price of energy staying high, solar panels can shave hundreds of pounds - as much as £545 per year, in fact - off your energy bills. Why cheap solar panels, then? Well, installing cheaper solar panels will reduce your initial installation cost, and, as a result, your break-even time, too.

How much do solar panels cost?

But the average solar panel system of 3.5kWp will cost around £7,000 to install, according to estimates from the Energy Saving Trust. The exact cost will vary, depending on the size of your home and how much electricity you want to produce. See how much you can expect to pay. Find out: are solar panels worth it?

Why should you compare solar panel prices?

Comparing solar panel prices helps ensure that the price quoted by the installer is the price you end up paying with no hidden costs. For a home in the UK the standard install size will be 3-4kW and require roughly 25m² of usable roof space for the installation. This size can be reduced with higher performing solar panels however.

How do I choose a cheap solar panel?

When it comes to questions around quality and reliability, there are three important things to consider before you select a cheap solar panel: the product, the supplier, and the installation. On the first point, your solar system's warranty matters. It's what you'll turn to should one or more of panels start to fail: so the longer, the better.

Are solar panels worth it in the UK?

Yes, installing solar panels in the UK is worth considering. They provide several benefits including reduced electricity bills, lower carbon emissions, and earnings from excess energy generation. What is more, solar panels pay for themselves in the range of 7 to 10 years on average. How much will 10 solar panels cost in the UK?

How much do solar panels cost in 2023?

They vary in price based on their wattage, size, use case, and panel type. One of the most common sizes in 2023 for a household in the UK is a 4kW solar panel system. The 4kW solar panel system costs between £6,000 and £7,000, requires around 16 panels and covers approximately 29 square metres of your roof.
