Are cheap solar panels a good idea?

With the cost of living crisis ongoing, and the price of energy staying high, solar panels can shave hundreds of pounds - as much as £545 per year, in fact - off your energy bills. Why cheap solar panels, then? Well, installing cheaper solar panels will reduce your initial installation cost, and, as a result, your break-even time, too.

How do I choose a cheap solar panel?

When it comes to questions around quality and reliability, there are three important things to consider before you select a cheap solar panel: the product, the supplier, and the installation. On the first point, your solar system's warranty matters. It's what you'll turn to should one or more of the panels start to fail: so the longer, the better.

How much does a solar panel cost in the UK?

The average cost of a solar panel system for a typical three-bedroom house in the UK is £9,600, including a battery. Solar panels can save you up to £1,014 annually, totalling nearly £30,000 of savings over their lifespan. Adding a solar battery can boost your energy savings by up to 90 per cent.
