

Why do some people sell photovoltaic panels

Do solar panels increase property value?

Because solar panels have so many benefits for homeowners, installing them on your property will increase its value. Houses that have solar panels will be more valuable than those that do not. This is because one home will be highly dependent on the grid whereas the other will be generating its own energy.

Why should you choose a solar panel?

Latest technology in solar panel efficiency means that solar panels are designed to get the most out of the sun. This means you can really take advantage of producing your own energy knowing that you are getting the best performance. It also makes solar more affordable because you can produce more energy for a longer period of time.

Who uses solar panels?

Government and big business corporations are also one of the biggest users of solar panels to generate clean, renewable energy. Businesses will use solar panels to slash the cost of their operation bills and free up cash flow to re-invest in their business.

Why should businesses use solar panels?

Businesses will use solar panels to slash the cost of their operation bills and free up cash flow to re-invest in their business. Governments around the world are taking a big step with solar energy and it is being used to power trains, buses and even the international space station.

Should you invest in solar panels?

More than a million homes in the UK now have solar panels. They're a guaranteed way to use truly renewable electricity, but many people are not sure about whether to invest. Some are put off by uncertainty about costs, others believe the installation will be disruptive and many worry that solar panels will be tricky to maintain.

Do you own solar panels?

You OWN the solar panels. Under these schemes, you pay for solar panels over a fixed period, say 20 years. There are no upfront costs, and instead you pay a monthly fee, which usually covers the solar panel and battery installation, repairs and maintenance.
