

Wind energy storage Djibouti

Why does Djibouti have a wind farm?

Less than half of the 123 megawatts of domestic installed capacity is operational due to outdated diesel-fired power plants. Djibouti has inaugurated its first-ever wind farm as the country looks to wean itself off imported fossil fuels and achieve a fully renewable energy powered grid by 2035.

Does Djibouti have a power plant?

Djibouti has long been reliant on imported fossil fuels for power generation, with as much as 80% of electricity sourced from neighboring Ethiopia. Less than half of the 123 megawatts of domestic installed capacity is operational due to outdated diesel-fired power plants.

Will Djibouti be 100% reliant on green energy by 2035?

"Our aim is to be the first country in Africa to be 100% reliant on green energy by 2035," Aboubaker Omar Hadi, chairman of Great Horn Investment Holding (GHIH), said in the statement. Djibouti has long been reliant on imported fossil fuels for power generation, with as much as 80% of electricity sourced from neighboring Ethiopia.

Does Djibouti have political risk cover?

The state's obligations are backed by political risk cover provided by the World Bank's Multilateral Investment Guarantee Agency. Djibouti has inaugurated its first-ever wind farm as the country looks to wean itself off imported fossil fuels and achieve a fully renewable energy powered grid by 2035.

How will the Red Sea Power wind farm benefit East Africa?

The \$122 million Red Sea Power wind farm will provide 60 megawatts of clean energy, boosting the East African country's capacity by 50%, and providing power to 38% of the country's 1.1 million people that are currently without access, according to an emailed statement. It will also remove 252,500 tons of carbon dioxide tons annually.

Who are Djibouti's investors?

The project is the country's first independent power producer and is backed by a consortium of investors including Africa Finance Corp. as lead developer, the Dutch entrepreneurial development bank, Netherlands-based Climate Fund Managers and GHIH, an investment firm owned by Djibouti Ports & Free Zones Authority and the Djibouti Sovereign Fund.

Investment in renewable energy infrastructure is the key to enabling our ambitions, and the inauguration of the groundbreaking Red Sea Power wind farm today is a major milestone. A reliable and cost-effective ...

The USD-122-million (EUR 113.6m) project marked the first significant international investment in the energy sector in Djibouti. It created the country's first independent power producer (IPP) with an already

The President of Djibouti, Ismail Omar Guelleh, carried out the landmark inauguration of Djibouti's first-ever wind farm on 10 September 2023. The 60MW clean energy plant boosts overall energy capacity by 50% while averting 252,500 tons of CO 2 emissions, equivalent to the pollution from over 55,000 buses.

Pioneering wind farm. The wind energy project will decrease emissions by approximately 154,526 tons of carbon dioxide equivalent per year when in operation. This aligns with the country's Vision Djibouti 2035, which aims to transition from complete reliance on domestic thermal energy in 2010 to 100% renewable electricity sources by 2030.
