

Wind turbine rental information

Why is wind turbine land rental important?

Why wind turbine land rental? The UK has an abundant wind resource and needs renewable energy to meet its greenhouse gas emissions reduction targets. A wind turbine land rental option on suitable land can generate a significant additional income stream without preventing landowners from continuing to use it for arable farming or grazing livestock.

Can I Rent my Land for a wind farm?

If you are a landowner or farmer with a suitably sized and located space for large scale wind turbine installations (5MW plus, around 2-20 turbines), you may be able to rent your land to specialist wind developers.

Which wind turbine should I rent?

Our rental model is the Endurance E-3120 wind turbine. The Endurance is a 55kW machine but we've found that it often out-performs other turbines rated at 80kW, making it an excellent choice for supplementing your power supply.

Are wind turbine land leases a good idea?

Wind Turbine Land Leases are ideal if you don't want to invest, but prefer to receive a rental income and enjoy cheaper electricity too. Start receiving a fantastic rent income every month, without ANY costs whatsoever. Our sister company AWP Wind pays for everything including legal costs, planning, grid, and the turbines.

How much land does a wind turbine use?

One wind turbine can require up to 80 acres of land, and each turbine will generate around 2.5 MW. Because wind turbines are spaced so far apart, surface activities like farming can still occur on much of the land. Depending on the specific lease agreement, you can still use much of your land during a wind lease.

Does earthmill rent a turbine?

The landowner does not rent the turbine; Earthmill rents the land that houses the turbine. The land rental area is usually around six to ten square meters and the land around the turbine is still fully functional for crops or grazing as before. The turbine belongs to Earthmill. What kind of turbine will you put up?

For each turbine a landowner allows to be installed and operated on their land, additional income can be generated. A single Wind Turbine up to a full-scale Wind Farm can provide landowners with a regular income, for no additional ...

Wind power boasts one of the lowest carbon footprints and lowest costs of all forms of electricity generation. And in the UK we are blessed with a climate that makes this one of the world's most wind-sure regions. ... This brings clear ...

Wind turbine rental information

Although there are lots of advantages of wind power generation, another drawback for landowners involves the use of arable land. And by that, we mean that you might lose a percentage of viable farmland to your new wind ...

Our Wind Turbine "All Risks" Insurance package is backed by a major insurer and includes cover for...
Material Damage - Insurance of the Wind Turbine itself; Breakdown Insurance - covers ...

The terms "wind energy" and "wind power" both describe the process by which the wind is used to generate mechanical power or electricity. This mechanical power can be used for specific ...

A Wind Turbine or Wind Farm Lease is a legal agreement between a landowner and a renewable energy developer or a wind energy company. This agreement allows the developer to install and operate wind turbines or an entire wind ...

The UK is an ideal place for such a renewable energy source due to the intensity of winds, especially along our coastlines. There are currently over 11,000 wind turbines in the UK, generating approximately 30 GW of electricity ...

Generating electricity gives landowners energy security and independence for years. Other renewable energy sources do this as well, but wind turbines are the cheapest per kW of them all. Turbines are a great option in the U.K because ...

Manufacturers are quickly realizing the importance of inspecting the wind turbine blades and towers regularly. The maintenance and repair of wind turbine components is essential for long-term profitability. ... Contact us for more ...

We specialise in the rental and servicing of PPE to the Offshore & Onshore Wind Industry including immersion suits, life jackets, harnesses, helmets and personal locator beacons. ...
